

LOLPG Exchange is a communications and networking app made available exclusively to Our Lady of the Lake Physician Group providers. Users can search for a provider by specialty or by name, learn more about other providers within the Physician Group or contact a provider directly.

Ensure you know the status of your loved one during a surgical experience at Beloit Health System hospitals. The Beloit Patient Trak (pTrak) is an application that allows family and friends to follow their loved ones surgical progress, from registration to recovery. Instead of being tied to a surgery waiting room for hours or being limited to the hospital facility by the geographic reach of a restaurant-style pager, now loved ones can use their mobile phones to receive notifications when the patient has moved through various stages of the surgical process, and, most importantly, they can be sure to be on site when the patient has recovered and can have visitors. Even family and friends who are out of state can follow the patients physical journey. This technology is available at select hospitals in Beloit Health System.-Real-time Alerts: Alerts are real-time messages sent to whomever the patient chooses throughout the surgical journey.-Freedom of movement: Distance is not an obstacle; this app eliminates the problem of being tied to a surgery waiting room or to a hospital area or even the hospital campus or town.-Reassurance: Alerts keep loved ones apprised of the patients journey.Reunited: Alerts allow loved ones apprised of the patients journey.-Reunited: Alerts allow loved ones to ensure they are present when the patient has recovered from surgery and is ready for visitors

PIT Control allows you to wirelessly control your UVA PIT System.* Graphical control flow makes it easy to use your UVA PIT System* Store all treatment records, including a detailed description and history of the therapy* Export all or a single treatment record in Excel/CSV or PDF formatContact us for more information on how to upgrade your UVA PIT System to make it compatible with PIT Control.

Siemens Healthineers drugs-of-abuse cross-reactivity app helps you quickly access information on drug interactions and assess the potential for cross-reactivity and false-positive results.

Personal Records is the fastest way to record and search your results in many types of workouts. Personal Records does a great job of recording results for the workouts that are important to you. Designed for the typical gym-goer who does not care to track and log EVERY workout but still wants to see how they are progressing in important movements.Calculate 80% of your best back squat either from the app or from the new Apple Watch app. The Personal Records app allows you to: Instantly see your personal records in all of your workouts on the main screen. Categorize your workouts with Tags. Calculate the percentages of your best lifts within the app. Instantly see how you are progressing in a workout through time.The PR app has support for tracking workouts that are scored by: Fastest time As many rounds as possible (AMRAP) As many repetitions as possible Heaviest weight And, as of version 2.8, you can track workouts with any units you choose!Spend less time logging, and more time exercising. Suggestions? Comments? Drop us a line @PersonalRecordsApp on Facebook or leave a review.CrossFit is a registered trademark of CrossFit Inc. This app is not affiliated with CrossFit Inc. in any way.

Pocket Prep is your award-winning tool in mobile learning and exam preparation. Pocket Prep allows you to study anywhere, anytime, right from your mobile device. We strive to make studying more efficient by redefining how you prepare for the Progressive Care Certified Nurse (PCCN) exam.* Academics Choice Smart Media award winner* EdTech Digest Cool Tool award winnerThe Science Behind Mobile Learning:Overloading your brain with too much information at once is a common study mistake. Research has shown that smaller, more frequent study sessions are the key to knowledge retention. In other words, taking short quizzes on the go is a much more effective means of exam preparation than reading page after page in a textbook. Apps offer the benefit of interaction, which means youre far more likely to remember a concept you engage with rather than one youve only read about.Take your PCCN studies with you, no matter where life takes you.PCCN Content Areas:- Cardiovascular- Pulmonary- Endocrine, Hematology, Gastrointestinal, & Renal- Neurology,

“It’s the best app with the most flexibility I have ever used for articulation. Suzanne Berhow, SLPI absolutely adore the app! It is so clean and crisp, full of content and options! Angie Gorz, ParentAll in all, a great app. ArtikPix Levels Plus is well worth the cost. Mary Huston, SLPArtikPix Levels is the next level articulation app! ArtikPix Levels has 3 engaging activities for students to produce their speech sounds at various levels as they swipe through flashcards, find matching pairs, and spin a wheel.In ArtikPix Levels, students can practice at the word level in the Matching activity, and they can practice at the word, phrase, sentence, and paragraph levels in the Flashcards and Pick or Spin activities. During the 3 activities, students interact with

real photos from 1 or more of the following 24 decks: b, ch, d, f, g, h, j, k, l, l-blends, m, n, p, r, r-blends, s, s-blends, sh, t, th, v, w, y, z. ArtikPix Levels has 1,477 total cards across the 24 decks with an average of 62 cards per deck and 126 cards in the r deck. More astounding is each target has content for the word, phrase, sentence, and paragraph levels; this means there are nearly 1,500 words, 1,500 phrases, 1,500 sentences, and 1,500 paragraphs in the app! The free version of ArtikPix Levels includes the th deck with in-app purchases to buy individual decks or all of the decks at once. The paid version of ArtikPix Levels Plus includes all 24 decks. To achieve an individualized experience for your students in ArtikPix Levels, configure each student on the following features: My Decks: select the desired decks Customize My Decks: customize the decks by selecting/deselecting sound groups (e.g., initial s) and individual words Grammatical Levels: select word, phrase, sentence, or paragraph levels Syllable Length: choose 1, 2, 3, and/or 4+ syllables Matching Level: select Easy (3 pairs), Medium (6 pairs), or Hard (10 pairs) Additionally, the following features are available for your students in the activities: Switch between students (up to 8 per activity) for individualized content and scoring Switch between the levels via tabs at the bottom of the activities Each target word is underlined in the phrase, sentence, and paragraph levels Pre-recorded professional audio for the word, phrase, and sentence levels. The paragraph level does not have audio, as it is intended as a reading task. Audio recording for audio feedback Video recording for visual feedback Take notes for each student and select prompt types (gestural, physical, verbal, visual) as necessary by tapping on a selected student Scoring for each sound group (e.g., final f) separated by independent and prompted responses Tallied data is automatically converted to percentage-based data Undo tallying mistakes by tapping the numbers at the bottom of flashcards or matching Save data in the app organized by student names, timestamps, sound group, and independent or prompted responses Export data to clipboard, email, and email as CSV Configurable options for audio (e.g., auto play and tap to play audio) and visual (e.g., hide matched cards) If you have purchased all of the pre-made content in the app, you can create your own custom cards using the camera, photos, or an Internet search.

The official app for RiverPark Family Dental (formerly Edgewood Dentistry) in Greenfield Wisconsin. In this app you will find maps of the locations for the offices and you will be able to call the office from the app or request an appointment by email. This app will also have updates with important information for our patients.

In 2011, pulse oximetry screening was recommended to improve the detection of critical congenital heart defects in newborns. This application was developed by Childrens Healthcare of Atlanta to aid healthcare professionals in implementing pulse oximetry screening in the newborn nursery. The algorithm is endorsed by the American Academy of Pediatrics and the American Heart Association.

And more please note: you must be a CMA member and have a cma.ca account to log into the Joule app

NCCN Guidelines for Patients are easy-to-understand resources based on the same clinical practice guidelines used by health care professionals around the world to determine the best way to treat a patient with cancer. They list options for cancer care that are most likely to have the best results. NCCN Guidelines for Patients feature questions to ask your doctor, patient-friendly illustrations, and large glossaries of terms used in cancer care. This format gives you access to the same information as your doctor. You will be able to talk to your health care team and decide what care and treatment options are best for you. The one-page NCCN Quick Guide sheets also summarize key points in the NCCN Guidelines for Patients and refer you back to the exact place in the full booklet to find more information.

****I really liked this app. With lots of stories already pre-made it saves me a lot of time and means that I can access stories for my kids right away. (Maureen, M.S.CCC-SLP)****The Social Norms app was created by a certified speech and language pathologist for children with autism spectrum disorder. This app helps children learn social rules and behaviors through stories. The Social Norms app is ideal for parents, educators, and speech language pathologists as it allows full customization. The users have the ability to add their own photos, text, and audio recordings to create individualized stories that teach specific skills that the child with autism spectrum disorder may have difficulty learning or understanding. The Social Norms app includes over 50 stories with clear graphics in the following categories: 11 Manners Stories: Saying Thank You, Excuse Me, I Am Sorry, Saying Hi, Using the Inside Voice, Sharing with Friends, Asking for Help, Waiting for My Turn to Talk, Personal Space, Picking the Nose, Passing Gas 15 Hygiene and Health Stories: Washing Hands, Brushing Teeth, Washing Hair, Brushing Hair, Taking a Bath, Showering, Getting Dressed, Trimming the Nails, Using Hand Lotion, Putting Sunscreen, Using the Toilet, Headache, Stomachache, Runny Nose, Eating Healthy 3 Safety Stories: Crossing the Street, Bike Safety, Seat Belts 6 Home Stories: Going to Bed, Cleaning Up Toys, Doing Homework, Helping Mom and Dad, Staying in the Chair During Mealtime 8 School Stories: Asking Someone to Play with Me, Waiting in the Hall, Answering in the Classroom, Being Bullied, Being Teased, Recess, Fire Drill, Following Directions in the Classroom 5 Community Stories: Going to the Dentist, Going to the Doctor, Going to the Hairdresser, Going to the Restaurant, Going Shopping 5 Behavior Stories: Biting Others, Pushing Others, Pulling Others Hair, Hitting the Head on the Wall, Running Away Although research is still needed in the area of teaching social skills to children with autism spectrum disorders through stories, a number of studies have concluded that using stories to teach particular social behaviors or skills are in fact successful and children may benefit from this type of intervention. Furthermore, evidence indicates that incorporating visual aids (e.g., visual activity schedules) has positive findings, suggesting that visual aids can be effective for teaching social skills and interactions (Reichow & Volkmar, 2010, p 161). The National Standards Project (National Autism Center, 2010) also supports teaching social skills through stories as an established treatment for children with autism spectrum disorder for children ages six to 14, with evidence-based findings. References: Reichow, B., & Volkmar, F. R. (2010). Social skills interventions for individuals with autism: Evaluation for evidence-based practices with a best evidence synthesis framework. *Journal of Autism and Developmental Disorders*, 40, 149-166.

This app is intended for use by both patients and staff of the National Maternity Hospital, Holles street, Dublin. It will act as a guide to aid clinical decision making by healthcare professionals in the NMH with regard to antimicrobial prescribing. This app may also be used by patients of the NMH to aid them in their own decision making processes with respect to antimicrobial treatment. National Maternity Hospital Guidelines:- Adult Antimicrobial Guidelines- Neonatal Antimicrobial Guidelines- Obstetric Emergency Protocols- NCHD Access to Medical Information at the point of care is critical in ensuring safe and effective medical practices. MEG Support Tools app provides a way for clinicians to deliver their guidelines, protocols and clinical practice guides to staff members on their own mobile devices. Access to this information at the point of care provides immediate guidance and helps to improve patient outcomes. For more information on the MEG system contact us through the developer links.

Manage Your Erectile Dysfunction allows the user to learn more about Erectile Dysfunction through medicine, exercise and nutrition. This app uses interactive tools such as images, videos and simple and accurate information on Erectile Dysfunction. Users can be informed on which foods should be consumed and which foods should be avoided. Besides, users can watch the most suitable exercises to manage the disease in video format with subtitles. Furthermore, users can calculate how many calories should be consumed daily in order to manage their weight. Users can additionally be reminded of any important action (ex: taking medication) or medical appointments. Users can also test their knowledge regarding Erectile Dysfunction in an amusing way through a little and funny quiz. Some information provided may not be valid for residents of other countries due to variations in medical practice and drug approval.

The Modus Health Card is a discount medical services platform comprised of some of Croatia's top medical clinics - from gynecological to pediatric, from dental to optical polyclinics, and more. Modus Health Card also includes discounts with supporting services such as hotels and spas, pharmacies, and taxi providers who can drive patients to and from their appointments, at a discounted rate. Visiting Croatia soon? Make sure to buy your Modus Health Card beforehand, or get one during your visit. By purchasing a "tourist pass" card (valid for one month), customers are able to utilize discounts from 10-40% on specialized private health care in the Modus network, numbering over 150 locations in Croatia. The platform is available via our smartphone app which can be downloaded free, while your activation code can be purchased online on our web site. The app provides info on the closest medical treatment facilities or pharmacy in your geo location via GPS locator, and is extremely practical and easy to use. Don't have a smartphone? You can purchase a conventional card as well. We'll ship it to you, or have it waiting for you at whatever location you choose, upon your arrival to Croatia. If you need help with travel or accommodations, just let us know how we can help you.
